Beyond The Ordinary

Our patent-pending **Capture and Removal Cleaning System** combines powerful products, advanced technologies and a high-productivity approach to create the most efficient and effective cleaning process available today.

More Efficient

Capture and Removal's unique team cleaning process is more productive than the traditional zone method, reducing cleaning time by up to 25%. That translates into fewer hours spent in your building, which directly **boosts your bottom line**.

More Effective

The Capture and Removal cleaning system does exactly what it says, trapping and taking away dust, dirt and debris-as much as 55% more airborne particulates than conventional cleaning. And better indoor air quality can mean a healthier, **more productive** work environment as well as **reduced sick-day absences**.*

* Healthy School Environment and Enhanced Educational Performance, The Case of Charles Young Elementary School, Washington, D.C., Carpet & Rug Institute, January 2002.

How Capture and Removal Cleaning Works

- A highly productive team cleaning process developed and perfected by ServiceMaster Clean
- Our patent-pending dust wand and microfiber technologies that collect dust and dirt rather than just moving it around
- Quiet, high-filtration vacuums that capture 99.9% of particles smaller than one micron in size
- Our proprietary **Green-for** suite of cleaning products
